

## Technical Information

### Zvezdapol TONER

#### Product description

**ZVEZDAPOL TONER** is a liquid pigment concentrate based on quality dispersion binders, lightfast pigments, fillers and appropriate additives.

##### Features:

- Concentrated
- Suitable for the "do-it-yourself" system
- Easily mixed
- Only for pastel shades

#### Purpose

It is used for manual shading of dispersion paints for interior walls to pastel shades.

The technical data are given in order to achieve optimal results by using products manufactured by HELIOS Srbija a.d. Contact our technical service for any additional information. The manufacturer reserves the right to make changes.

#### Preparation instructions

Mix the dispersion paint well, then add the desired toner concentration, 1 bottle (100ml) to a 25kg bucket. Shake the toner well before use and then mix it into the dispersion paint manually or with an electric mixer until it is completely homogenized.

The toner is used undiluted. Rinse the bottle with water and add as a dilution medium to the dispersion paint.

#### Working conditions

- The optimum operating temperature is from +10°C to +30°C.
- It must not be applied at temperatures below +5°C or above +35°C and humidity higher than 80%.

The stated conditions refer to the space, the substrate and the material itself.

#### TOOLS CLEANING

Immediately after use, the tool should be thoroughly washed with water. If the tool is not washed immediately after use, remove hardened residues mechanically. Removal can be facilitated by immersing the tool in water for several hours.

#### Technical data

Density (g/cm <sup>3</sup> , 20°C), ISO 2811:	1.00 - 1.30
pH:	8 - 9
Consumption:	20-30 g/m <sup>2</sup> of concentrated base, depending on the surface porosity.
Packaging:	Plastic packaging 100ml
Storage and shelf life:	Originally sealed product, stored in a dry place, protected from direct sunlight and freezing (+ 5°C to + 30°C) usable for 24 months from the production date: <b>THE PRODUCT MUST NOT FREEZE!</b>
